CYBERPEACE SUMMIT 2.0

February 8-10, 2026 | New Delhi, India

Event Overview

The **Global CyberPeace Summit 2.0** convened global leaders, policymakers, cybersecurity experts, researchers, industry executives, and civil society representatives to shape the future of cybersecurity governance, digital trust, and AI safety.

Building on its first edition under the G20/C20 initiatives, the 2026 Summit served as a strategic prelude to the India AI Impact Summit and advanced a bold vision: **from reactive cybersecurity to proactive Cyber Diplomacy and Societal Resilience.**

Event Dates	**Flagship Venue**
8–10 February 2026	Bharat Mandapam

Organizers: CyberPeace Foundation in collaboration with Knowledge Networks

Theme: Building a Global CyberPeace Framework for the Digital Era

Strategic Objectives

Global Cyber Norms

Advancing shared international principles for responsible state conduct in cyberspace.

Ethical AI & Governance

Establishing safeguards for trustworthy AI adoption, addressing risks from agentic AI, deepfakes, and autonomous systems.

Critical Sector Resilience

Strengthening cyber preparedness across finance, energy, healthcare, and national digital infrastructure.

Inclusive Cyber Literacy

Expanding cyber hygiene education to children, senior citizens, and underserved communities.

Knowledge Networks Panel Sessions

Panel 01: AI Safety & Trust

Theme: Building Responsible AI for a Secure Digital Future

Date: 10 February 2026

Moderator

Sanjay Puri

Global Speaker on Generative AI & AI Governance
Host, RegulatingAI & CAIO Connect Founder, Knowledge Networks

Panelists

Annamalai Ramanathan

President & CEO, RiteNet Corp; Technology leader delivering secure, mission-critical solutions for federal and defense organizations.

Session Focus

The panel examined global AI governance frameworks, collaborative mechanisms for responsible AI deployment, and the institutional safeguards necessary to build citizen and government trust in AI systems. The discussion emphasized transparency, traceability, and cross-border regulatory alignment.

Panel 02: AI-Powered Cybersecurity

Theme: From Threat Detection to Autonomous Defense
Date: 10 February 2026

Moderator

Sanjay Puri

Global Speaker on Generative AI & AI Governance
Host, RegulatingAI & CAIO Connect Founder, Knowledge Networks

Panelists

Dr. Bhaskar Chatterjee

CEO, Anil Agarwal Foundation (Vedanta Group); Principal Architect of India's CSR Framework; widely regarded as the "Father of CSR in India."

Srinivas Mantripragada

Founder, Maaya AI; Senior Product & Technology Executive (CTO/CPO); Former executive at IBM, Infoblox, and VMware with deep expertise in cybersecurity and cloud platforms.

Session Focus

This panel explored the next frontier of AI-enabled cybersecurity, including agentic AI systems, autonomous defense mechanisms, and the protection of critical digital infrastructure. The discussion highlighted the need for ethical guardrails and global policy coordination as cyber conflict becomes increasingly AI-driven.

Moonshots.TV Global Launch

The Summit marked the official launch of

Moonshots.TV

Moonshots.TV is the world's first 24/7 global OTT platform dedicated exclusively to startup pitches, demo days, and innovation showcases. While most pitches disappear after event day,

Moonshots turns every pitch into a broadcast asset - discoverable by investors, enterprises, mentors, and institutions across geographies.

Impact & Outcomes

Global Convening Power

- High-level participation across government, industry, academia, and civil society.
- Strengthened Global North–Global South collaboration in cyber governance.
- Elevated India's leadership in digital trust and AI governance discussions.

Policy & Governance Influence

- Advanced structured dialogue on global cyber norms.
- Integrated AI safety into broader cybersecurity resilience frameworks.
- Reinforced the link between democratic stability and digital governance.

Ecosystem Building

- Catalyzed partnerships across regulatory, technical, and diplomatic communities.
- Positioned CyberPeace Summit as a premier international platform shaping cyber diplomacy.

Strategic Value

CyberPeace Summit 2.0 marked a decisive shift in global cybersecurity dialogue moving from incident response to systemic resilience, AI governance, and international coordination.

The Summit affirmed a central principle

"CyberPeace is not merely a technical ambition
it is a geopolitical, societal, and human imperative for the digital age."
